Department of Chemistry Seminar

“Safety at the SEH”

The Laboratory Safety Standard training program covers policies applicable to all employees and students engaged in the laboratory use of hazardous chemicals. Training topics include descriptions of chemical hazards in the workplace, permissible exposure limits, symptoms of overexposure and methods to detect and reduce hazardous exposure. Required training is provided to faculty, staff, teaching assistants, and laboratory technicians in Chemistry, Physics, Biology, Psychology, Earth & Environmental Science, Forensic Science, Anthropology, and Environmental Engineering. Students are welcome.

*If you cannot attend, please speak with Shanna to learn how to make-up the training.*
