7th Annual Chemistry Undergraduate Research Poster Symposium

On behalf of the Chemistry faculty, we are proud to invite everyone to the 7th annual Chemistry Research Poster Symposium of undergraduates working in the chemistry research labs. These students have made significant contributions in a wide variety of fields under the direction of their faculty mentors, and many have won awards and fellowships to fund these projects. It is with great pleasure that we highlight their efforts.

Poster presenters will include: Kusuma Devi Alaparthi, Yiorgos Argyros, Sarah Chachula, Jacqueline Dyer, Natalie Falco, Margaret Furey & Molly Little, Helia Imany-Shakibai, Addie (Anood) Abdel Jawad, Tabinda Khan, Yasemin Losee, Logan Malik, Hayley Meyers, Kavya Samudrala, Fahim Syed, and Tina Tran.

In addition to the rigorous education in the fundamental areas of chemical theory and experimentation along with a hands-on approach to modern laboratory practices and instrumentation, laboratory research on active projects is an opportunity for undergraduates to harness their talents and agile minds and to tackle open questions in the scientific community. By engaging majors in research projects along side of our faculty and doctoral students, these undergraduates experience the thrill, frustration and tremendous satisfaction of uncovering new science. This solid foundation in the chemical sciences and experiential learning prepares our students to be competitive in pursuit of careers in academia, professional programs, industry, and government.

Friday, May 4, 2018
SEH B1167, ivy wall area
2:00 – 3:30 p.m.
Light refreshments will also be served
